

BEST PRACTICES IN MY INSTITUTION

Format of Presentation

Institutions may have many good practices that add value to the quality of education they offer. For presentation of each of those practices the following format may be used. Care may be taken to avoid general descriptions and focus may be on concrete practice.

1. **Title of the practice:** Madhava Mathematics Competition.
2. **The context that required the initiation of the practice (100 – 120 words):** The Jhargram Raj College is located in a backward place commonly known as “Jangal Mahal”. The College is affiliated to Vidyasagar University and a large number of Students are only concerned about the University Examinations and are not explored to how to learn the subject via problem solving approach. As a result they are not able to explore many ideas of Mathematics via problem solving. So to enhance the problem solving skills among the students and for the betterment of their knowledge in understanding the Mathematics this initiation was required.
3. **Objectives of the practice (50 – 60 words):** The very objectives of this competition is to enhance the problem solving abilities, thinking capabilities among the students and to motivate them to look into several text books on the subject so that they can have better understanding about the subject.
4. **The Practice (250 – 300 words):** The International Congress of Mathematicians (ICM), 2010 was organized by India and in the very event the number of speakers from India was not satisfactory. After this some of the National Board for Higher Mathematics (NBHM) committee members found that although for the School Students there is a competition like Mathematics Olympiad but there was nothing like for the College Students so they took the initiative for conducting this competition among the College students. This competition was started in the Academic Year 2009-2010. It is organized by Department of Mathematics, S.P.College, Pune and Homi Bhabha Centre for Science Education, TIFR Mumbai and funded by NBHM, Dr.V.M.Sholapurkar is the Chief Coordinator of this

event. Details of which can be found in <http://www.madhavacompetition.com/> . The centre of this competition in Kolkata Region is St. Xavier's College (Autonomous), Kolkata and Md. Rabiul Islam, Assistant Professor of Mathematics is the Local Coordinator. It can be viewed as an extension of the Olympiad competitions to the undergraduate classes. The competition is named after the great Mathematician and Astronomer Madhava who in fourteenth century, profound Mathematical Ideas which are now part of calculus. The duration of this competition is three hours and generally calculus of one variable, elementary algebra, elementary combinatorics, puzzle type problems are asked. The main features of the competition are there are attractive cash prizes and medals for the rank holders, several cheer prizes, participation certificates for all the participants and there is a nurture camp for the selected students.

5. **Obstacles faced if any and strategies adopted to overcome them (150 – 200 words):**

No big obstacle was faced while organizing the competition.

6. **Impact of the practice (100 – 120 words):** On 06.01.2019 the Madhava Mathematics Competition was organized in the Jhargram Raj College for the first time. Although the number of students registered in this competition was 76 and the total number of participants appeared in this very competition was 46. After this competition Department of Mathematics, Jhargram Raj College became a Madhava Mathematics Centre due to which fund from NBHM can be arranged and on 21st and 22nd November a Madhava Mathematics Workshop was smoothly organized in which more than 80 participants including students and faculties of different Colleges participated which made the event very successful.

7. **Resources required:** While organizing the competition the resources required are the following

- (i) The Registration fee (Rs. 100/-) was collected from the candidates.
 - (ii) The Venue of the competition was Jhargram Raj College, the very permission for conducting the competition was given by the College Authority.
 - (iii) The invigilators of the competition were Sri Sandip Sarkar and Sri Abhoy De, both are Assistant Professor of Mathematics (W.B.E.S.), Jhargram Raj College.
 - (iv) Support staff (non teaching and security) was provided by the College Authority.
-

Format for Presentation of Best Practises (Librarika:ILS)

1. Title of the Practice:

Digitalization of Departmental Libraries using Librarika: The Free Integrated Library System (ILS)

2. Objectives of the Practice:

Digitalization of the library was primarily conceptualised keeping in mind the needs of students. For several years we had observed that it was difficult for students to perceive the potential of departmental libraries as practically it was not possible to give access to see all the books which are present in the libraries when they need them most. Also managing all the books and updating all the lending information was difficult for the teacher who took charge of the departmental library. So, based on the modern advancement of technologies in all the fields, we started to use this ILS which doesn't need extra charges. Through this platform students can access their respective departmental catalogue and ask for lending, even from smartphones. Also, the teacher-in-charge of the library can check and update the catalogue at their ease.

Another goal was to make all the processes related to departmental libraries digitised, transparent and completely paperless, i.e. converting it to a green yet completely sustainable platform.

3. The Context:

The main challenging issue was to understand the potential and prospect of this ILS platform for the first time. But a couple one to one discussion with our students and teachers initiated explosive positive chain reactions between them and within a few weeks of the experimental initiation at the Department of Zoology of this college. Within a few months it emerged as a much-anticipated successful project.

4. The Practice:

The practice was first initiated as an experimental project in the year of 2018, at the Department of Zoology. Here it is unequivocally accepted by all the UG and PG student communities within a few months and also the vibe spreads across other departments. The project was unique in that it completely replaced the year-old error and damage prone method of maintaining paper register books within a month. Since then all the transactions became digitalized and all the records were maintained in the cloud server of librarika.

After the success of the pilot project, the Department of Mathematics and Philosophy started the project and IQAC disseminated the idea through all the departments.

Initially departments faced a crisis to implement the project due to lack of proper IT infrastructure.

5. Evidence of Success:

It would be good to provide proof instead of words to shade light on the success of the story. Hereby we are attaching the system generated report of Zoology and feedbacks from the students of the Zoology department where the project was conceptualised.

6. Problems Encountered and Resources Required:

Major problem we faced throughout the project is the lack of proper IT infrastructure. For running this project each department needs at least one desktop and uninterrupted high speed internet facility as Librarika is a cloud based project .

7. Notes (Optional):

Desktop related problem has been solved by the college administration. Now the only hurdle is to overcome the problem of getting uninterrupted high speed internet through all the departments.

Report: Circulations
